

Performance you can trust

ROCOL®

SELECT

OUR EXPERTS' CHOICE,
YOUR MAINTENANCE SOLUTION

High performance products chosen by our experts and trusted
by our customers worldwide to deliver exceptional performance

ROCOL®

Our experts have selected 15 essential products that our customers use and trust every day in businesses across the world.

Products that are proven to:

- ▶ reduce downtime
- ▶ avoid costly recalls
- ▶ improve operating efficiency
- ▶ comply with demanding audit requirements

SELECT THE BEST

▶ CHAIN LUBRICANTS

CHAIN & DRIVE SPRAY

High performance chain and conveyor lubricant.

Why SELECT it?

Protects and maximises life for all types of chains even in extreme conditions.

- Ensures maximum penetration, lubrication and corrosion protection of chain links and pins.
- Reduces 'throw off', dripping and protects in wet or humid environments.
- Chain Guard Hi-Load available for extreme applications e.g. fork lift truck chains.

▶ CLEANERS

INDUSTRIAL CLEANER RAPID DRY SPRAY

Fast evaporating multi-purpose cleaner that removes all grime, grease, dirt and other workplace contamination.

Why SELECT it?

- NSF K1 registered - suitable for use on food processing equipment and utensils.
- Dries rapidly and completely leaving a residue free surface.

FOAM CLEANER

Fast acting white foam cleaner.

Why SELECT it?

- The foam clings to vertical surfaces, preventing contamination by run-off or dripping.
- NSF A1 registered - suitable for use in and around food processing areas.

▶ FOR MACHINE SHOPS

RTD® FOAMCUT SPRAY

Foaming metal cutting lubricant.

Why SELECT it?

- Doubles tool life, reduces tool wear, promotes improved surface finish, increases rates of metal removal, minimises waste and scrap, reduces drill and tap breakages.
- Easy and safe use on rotating applications.
- Foaming action adheres to the tool, stays where it needs to be for longer.
- Rapidly penetrates to the cutting edge, gets where it needs to be quickly.
- Non-foaming version also available.

MOISTURE GUARD SPRAY

Thin, almost dry corrosion protective film.

Why SELECT it?

- For indoor corrosion protection of components such as bearings, gears, pressings and any machined metal product.
- Flexible film, does not chip or break.
- Protects against corrosion caused by moisture or damp atmospheres.

RTD® LIQUID

The original cutting fluid for ultimate cutting protection.

- Flows to the cutting edge
- Oil and solvent free
- Available in a plastic squeeze bottle for easy application

RTD® COMPOUND

Soft low melting point paste.

- Rolls Royce approved, specs CSS 137 Type B and C.
- Formulated to cling to the tool, stays where it needs to be for longer.

CL Chlorine Free versions available for RTD® Compound and Liquid.

▶ BEARING GREASES

SAPPHIRE® SPRAY GREASE

High performance aerosol applied grease.

Why SELECT it?

- For all types of bearings, slides, bushes, linkages and pins.
- Ideal electrical contact grease.
- Particularly suitable for high speed bearings and those subjected to extremes of temperature.
- Protects against corrosion in humid, damp and wet conditions.

SAPPHIRE® 2

Heavy duty bearing grease for all types of ball, roller and plain bearings.

Why SELECT it?

- To lubricate and protect all types of ball, roller and plain bearings.
- Protects against corrosion in humid, damp and wet conditions.
- Outstanding film strength, the grease stays where it is needed.
- Temperature range -30°C to +160°C.

SAPPHIRE® ADVANCE 2

Multi-purpose grease, fortified with PTFE, for multiple applications.

Why SELECT it?

- Provides high load, EP performance of 560kg - superior to standard soap thickened lubricants.
- Superior performance in high speed and high load conditions.
- Long lasting grease - provides extended lubrication intervals.

'The product we were using caused us to fail vital compliance testing. Rocol stepped in and came up with the ideal solution.'

PRECISION SILICONE SPRAY

Multi-purpose, non-toxic silicone spray for use as an anti-stick agent.

Why SELECT it?

Provides a light, long life lubricating film for applications such as links, pins, chutes, slides etc.

- Resists oxidation and corrosion.
- Temperature range -50°C to +200°C.

DRY PTFE SPRAY

Dry, lubricating film for applications such as guides, pins, chutes, slides etc.

Why SELECT it?

- Provides a light, long lasting, totally dry lubricating film where silicones cannot be tolerated.
- Temperature range -200°C to +270°C.
- High PTFE content resists chemical attack.

▶ ANTI-SEIZE

ANTI-SEIZE COMPOUND

An assembly and anti-seize lubricant for use on all static fasteners and mechanisms

Why SELECT it?

Protects against pick up and seizure issues even in extremely adverse conditions

- Lubricates, protects and eases dismantling.
- Particularly suited to extreme wet conditions even when submerged in seawater.
- Temperature range -50°C to +1100°C

PENETRATING SPRAY

Powerful release agent for corroded threaded fasteners and other seized components.

Why SELECT it?

- To penetrate and release seized or corroded fasteners even after prolonged periods of seizure.
- Corrosion inhibitors provide a protective film against further attack after use.
- Fast acting formulation minimises time and effort.

'We called Rocol in to solve a specific problem and ended up solving several more by ordering other products in the range.'

'The Rocol team worked out exactly what was needed, saving the business both time and money.'

▶ DRY LUBRICANTS

Solutions for when wet lubricants cannot be tolerated.

DRY MOLY SPRAY

Dryfilm coating of molybdenum disulphide in aerosol form.

Why SELECT it?

- To provide wear resistance and lubrication to sliding mechanisms: plain bearings, pins, cams and slides.
- Temperature range 50°C to +450°C.
- Resistant to high loads (up to 7,000 kg/cm2).
